Website Analysis For CfontPro.com

Prepared By: Chris Hanscom

Issue Report

Site quality report for <http://www.cfontpro.com/> produced on May 28, 2009.

Category	Results
Overall Quality	 53 pages with quality issues
Errors	 5 pages with broken links or other errors
Accessibility	 37 pages with accessibility problems
Compatibility	 8 pages with browser specific issues
Compliance	 20 pages with compliance or legal issues
Search	 24 pages with search engine issues
Standards	 38 pages have W3C standards issues
Usability	 36 pages with usability issues
Totals	106 pages and images checked

Errors

This section shows site quality issues, including broken links and server mis-configurations.

PriorityURL / Description

-  **Broken links - Some pages contain links that don't work.**
-  Server configuration - No issues found.
-  ASP, ASP.NET and PHP script errors - No issues found.
-  Internet RFCs - No issues found.
-  Page Content - No issues found.

-  This image is corrupt. This can be caused by the following: running out of disk space quota during image file uploadtransferring the image using FTP text modesaving the image with the wrong extension (e.g. saving as JPEG, but using a .gif extension)
<http://www.cfontpro.com/images/price.gif>

-  This link is broken. The page could not be found on the target web server. Fixing this depends on how the link became broken: The link has been mistyped and should be fixed The destination page has moved and the link should be updated The destination page no longer exists and the link should be removed A file has been accidentally deleted and should be replaced

Accessibility

This section shows accessibility issues, indicating problems for disabled users.

PriorityURL / Description

- ⊗ **WCAG Priority A - Issues found (disabled users will find it impossible to use some pages).**
- ⊗ **Section 508 - Issues found (disabled users will find it impossible to use some pages).**
- An ID value is not unique.
<http://www.cfontpro.com/press.asp>
<http://www.cfontpro.com/support.asp>
- Each section of content should begin with a heading tag (H1, H2, H3), but this page has no heading tags. Divide the content with headings so that the top level heading is H1, sub-headings are H2 and so on. Use CSS style rules to change heading font styles if needed.

http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg
- If you set any of the colors on the BODY tag you must set all of them. In HTML the color attributes are TEXT, BGCOLOR, LINK, ALINK and VLINK. In CSS the attributes are COLOR and BACKGROUND-COLOR. Some users have browser defaults set to white text on a black background, so setting one color without setting the others can result in black text on a black background.
<http://www.cfontpro.com/Styles/style.css>
<http://www.cfontpro.com/support/style.css>

http://www.cfontpro.com/view_picture.asp?filename=cf_charmap.jpg

http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg

- IMG tags must have an ALT attribute. Non-sighted users can't see pictures, so each image should have an ALT attribute describing the content of the picture, which screen readers can read aloud.

<http://www.cfontpro.com/contact.asp>
<http://www.cfontpro.com/donate.asp>

- Provide a way to skip repetitive navigation links. Without a skip link, screen readers read out the navigation links on every page before reading the page content. This is often done by having a "Skip to Content" link at the start of the document hidden by CSS, so it only renders in a speech reader.

<http://www.cfontpro.com/terms.asp>

- Removing the underline from links makes it hard for color-blind users to see them. Remove the text-decoration:none property from your link styles, or add other non-color style attributes to distinguish links.

<http://www.cfontpro.com/Styles/style.css>

- This form control has no associated LABEL element. Add a LABEL tag with the FOR attribute set to the id of this control. This allows screen readers to tell the user what each control does.

<http://www.cfontpro.com/contact.asp>

- This form has fields without LABEL elements or TITLE attributes. Screen

readers use LABEL elements or TITLE attributes to describe form fields to non-sighted users. Without these, forms are very hard to use with a screen reader. Forms designed to be completed online shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.

<http://www.cfontpro.com/contact.asp>

- This page has duplicate IDs which cause problems in screen readers and other assistive technologies.

<http://www.cfontpro.com/press.asp>

<http://www.cfontpro.com/support.asp>

- This page has markup errors which cause problems in screen readers. Markup errors mean screen readers and assistive technologies miss important page content.

http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg

- Avoid specifying a new window as the target of a link with target="_blank". Displaying new windows without warning is very confusing to non-sighted users because some screen readers do not give any indication when new windows appear. If you cannot avoid displaying a new window, insert a warning like the following: "This link will open in a new window".

<http://www.cfontpro.com/support/index.asp>

- Create pages that validate to W3C recommendations. This document contains markup errors. To pass this checkpoint you must fix all the HTML Validation errors in the Standards section of the report.

http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg

http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg

Don't use generic text like "click here" or "read more" in link text, because it says nothing about the link target when read out by a screen reader. Either change the link text, or add a TITLE attribute to the link with a fuller description of the link destination.

Link text: "DOWNLOAD"

<http://www.cfontpro.com/>

Provide information about the general layout of a site using as a site map or table of contents. You should provide a link labeled 'Site Map' or 'Sitemap' on every page.

<http://www.cfontpro.com/>

The FONT element should not be used in accessible documents.

<http://www.cfontpro.com/terms.asp>

Use relative rather than absolute units in CSS property values. Absolute units are cm, mm, in, pt and pc, as well as absolute size keywords like x-small. Partially sighted users often use the "large fonts" mode of Windows, which makes each pixel larger than usual. This usually causes problems with pixel based layouts, which also perform badly on handheld and widescreen displays. Percentage values "stretch" according to screen size and work on a large range of display sizes.

<http://www.cfontpro.com/Styles/style.css>

Use relative rather than absolute units in HTML attributes. Use percentages rather than pixels for sizing frames and tables. Partially sighted users often use the "large fonts" mode of Windows, which makes each pixel larger than usual. This usually causes problems with pixel based layouts, which also perform badly on handheld and widescreen displays. Percentage values "stretch" according to screen size and work on a large range of display

sizes.

Search

This section shows search engine guideline violations, and pages that don't comply with search optimization best practices.

Priority URL / Description

- ⊗ **Google Search Guidelines - Some pages may rank poorly on Google.**
- ⊙ MSN Search Guidelines - No issues found.
- ⊗ **Yahoo Search Guidelines - Some pages may rank poorly on Yahoo.**
- ⊙ Robots.txt Guidelines - No issues found.
- ⊗ **Search Best Practices - Some pages could rank higher in search engines.**

- Google and Yahoo recommend that all pages have a TITLE tag.
http://www.cfontpro.com/view_picture.asp?filename=cf_charmap.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_detailed-view.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_export.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_find.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_find_computer.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_main.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg
- Google recommends separating words in URLs by dashes instead of underscores. Google treats dashes in URLs as spaces, so dash-separated words in the URL can be searched for and boost page ranking.
http://www.cfontpro.com/press_20041118.asp
http://www.cfontpro.com/press_20041222.asp
http://www.cfontpro.com/press_20050831.asp
http://www.cfontpro.com/press_20061019.asp
http://www.cfontpro.com/press_20071026.asp
- Google recommends using an XML sitemap to increase coverage of your web pages by search engines. Electrum produce a site mapping tool called PowerMapper that exports XML sitemaps.
Sitemap not found at <http://www.cfontpro.com/sitemap.xml>
<http://www.cfontpro.com/sitemap.xml>
- Offer a site map to your users with links that point to the important parts of your site. Links embedded in menus, list boxes, and similar elements are not accessible to web crawlers unless they appear in your site map. If the site map is larger than 100 or so links, you may want to break the site map into separate pages. Electrum produce a site mapping tool called PowerMapper that builds site maps automatically.
<http://www.cfontpro.com/>
- Text presented in graphics form only cannot be searched.
http://www.cfontpro.com/view_picture.asp?filename=cf_main.jpg

- Dynamic pages with more than two parameters may be ignored by Google. The pieces of the URL after the "?" and separated by "&" characters are called parameters. A technique called URL rewriting often solves this issue.
http://www.cfontpro.com/func_thumbnailimage.aspx?type=basic&filename=/images/cf_c_harmap.jpg&width=150&height=150
http://www.cfontpro.com/func_thumbnailimage.aspx?type=basic&filename=/images/cf_detailed-view.jpg&width=150&height=150

- Required attribute "alt" not specified.
<http://www.cfontpro.com/contact.asp>
<http://www.cfontpro.com/donate.asp>
- An unknown entity has been used. This often happens when ¶m=value is used instead of &param=value in URL query strings. In HTML the ampersand character (&) is reserved for marking character entities so you should never use raw ampersands in HTML - including ampersands inside URLs. For example, any URL that needs an ampersand should look like:
<http://www.example.com/file.html?var1=val1&var2=val2&var3=val3>
<http://www.cfontpro.com/support/property.asp>
- CENTER element is deprecated in HTML 4.01. HTML font tags should be replaced by equivalent CSS rules. The CENTER tag is equivalent to the following CSS rule: p.centered { text-align: center; }

Usability

This section shows general usability issues, indicating navigation problems for all users.

PriorityURL / Description

- ⊗ **Usability.gov Guidelines - Some pages violate these guidelines.**
- ⊗ **W3C Best Practices - Some pages are hard to use.**
- ⊗ **Readability - Some pages are hard to read.**

- Have a link labeled 'Home' on every page on the site, except for the home page. Many sites place the organization's logo on the top of every page and link it to the homepage. While many users expect logos are clickable, around 25% will not realize that links to the homepage. Therefore, include a link labeled 'Home' near the top of the page to help those users.
http://www.cfontpro.com/view_picture.asp?filename=cf_charmap.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_detailed-view.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_export.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_find.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_find_computer.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_main.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg
- Users should be able to quickly look at each link and tell where it goes. Don't use generic link labels like "click here" or "read more" because they're hard to tell apart when users scan a page.
Link text: "...more"
<http://www.cfontpro.com/>
- Do not create or direct users into pages that have no navigational options. No links out of these pages found. Many Web pages contain links that open new browser windows. When these browser windows open, the Back button is disabled, and if the new window opens full-screen, users may not realize that a new window has appeared, and become frustrated because they cannot press Back. Popup windows should contain a prominent control that closes the window.
http://www.cfontpro.com/view_picture.asp?filename=cf_charmap.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_detailed-view.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_export.jpg

http://www.cfontpro.com/view_picture.asp?filename=cf_main.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg
- Important information should be available within two or three clicks of the homepage. The more steps (or clicks) users must take to find the desired information, the greater the likelihood they will make an incorrect choice.

This page is 5 clicks from the home page.

<http://www.cfontpro.com/support/info.asp>

This page is 5 clicks from the home page.

<http://www.cfontpro.com/support/options.asp>

- Omitting IMG WIDTH or HEIGHT attributes means page text jumps about as images load. This makes the page very hard to read while it's loading. Add width and height attributes to the img tag matching the image dimensions. Authoring tools like Dreamweaver can automate this process.

http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg

- Provide a search option on each page of content-rich Web sites. A search option should be provided on all pages where it may be useful - users should not have to return to the homepage to conduct a search. Search engines can be helpful on content-rich Web sites, but do not add value on other types of sites.

http://www.cfontpro.com/view_picture.asp?filename=cf_main_viewing.jpg
http://www.cfontpro.com/view_picture.asp?filename=cf_properties.jpg

- ▶ The IMG WIDTH and HEIGHT attributes don't match the actual image size. This means the image will be scaled or distorted.

Image <http://www.cfontpro.com/images/price.gif>
<http://www.cfontpro.com/>

- ▶ To enhance readability, sentences should be 20 words or less, and paragraphs 6 sentences or less. To improve readability, minimize the number of words in sentences, and the number of sentences in paragraphs.

<http://www.cfontpro.com/>
<http://www.cfontpro.com/terms.asp>

- ▶ Use LABEL tags for each data entry field to show what data is expected. Make sure each INPUT field has an associated LABEL tag describing the field.

<http://www.cfontpro.com/contact.asp>

- ▶ Use text links rather than image links. In general, text links are more easily recognized as clickable. Text links usually download faster, are preferred by users, and should change colors after being selected. It is usually easier to convey a link's destination in text, rather than with the use of an image. Users often find it hard to tell which images are clickable without moving the cursor over them ('minesweeping'). Another benefit to using text links is that users with text-only and deactivated graphical browsers can see the navigation options.

<http://www.cfontpro.com/>
<http://www.cfontpro.com/contact.asp>

<http://www.cfontpro.com/resources.asp>
<http://www.cfontpro.com/screenshots.asp>
<http://www.cfontpro.com/support.asp>
<http://www.cfontpro.com/terms.asp>

- ▶ Use at least a 12-point font on all Web pages. The following are all smaller

than 12 point: `<p style="font-size: 11pt;" ><p style="font-size: 11px;" ><p style="font-size: small;" >` For users over age 65, it may be better to use at least fourteen-point fonts. Never use less than nine-point font on a Web site.

<http://www.cfontpro.com/Styles/style.css>

<http://www.cfontpro.com/support/style.css>

- Use italic text sparingly - for one or two words or a short phrase. Keep runs of styled text to less than 50 characters. When used well, styled text draws attention to important words, but also decreases reading speed by almost twenty percent.

<http://www.cfontpro.com/terms.asp>

- Use site maps for Web sites that have many pages. Site maps provide an overview of the Web site. They may display the hierarchy of the Web site, may be designed to resemble a traditional table of contents, or may be a simple index. You can add a site map with a tool like PowerMapper.

<http://www.cfontpro.com/>

- This page has no title. Each page should have a descriptive and meaningfully different title. Title refers to the text shown in the browser title bar, and displayed in search engines results pages. If two or more pages have the same title, they cannot be differentiated by users or the Favorites capability of the browser.
